Option II: Tuesday, June 12, 2012 - Friday, June 22, 2012 (**Marshfield only**)
(10 full days including Saturday, June 15; No class on Sunday, June 16)

This course provides the synthetic organic chemistry laboratory experience needed for chemistry and science majors, and pre-professional majors in medicine, dentistry, pharmacy, and chiropractic. This accelerated schedule includes 85 hours of instruction and lab over a two-week period of time.

The goal is to provide a laboratory experience for students who are taking organic chemistry lecture at small campuses via distance education but who do not have access to laboratory instruction. The course will also serve other students who have been unable to complete organic chemistry laboratory.

CHE 352 (CHEM 344 at UW-Madison) includes reactions and techniques typically covered in both semesters of organic chemistry lecture, CHE 343 (CHEM 343 at UW-Madison) and CHE 363 (CHEM 345 at UW-Madison). Students enrolled in CHE 352 are expected to demonstrate understanding of all reactions and techniques covered in the laboratory, regardless of prior exposure in lecture courses.
